Internet Calling Card Services

System Requirements:

IBM PC 166Mhz, 32MB system Ram, 5 Mb Disk space with Windows 95, 98, 2000, ME, NT, XP

A good headset is strongly recommended

Full Duplex Sound Card, Headset or Multimedia Speakers and Microphone

An Internet connection is required to make PC calls.

NetMeeting

NetMeeting is available on all Windows 9x/Me/NT/2000/XP.

Start netmeeting, deselect directory service.

Under Advanced options, select Gatekeeper enter the Gatekeeper IP address.

Select logon using your account name.

Enter your account number and password separated by # sign. You are all set.

PC Dialer Software

PC Dialer Software can be downloaded from our site www.lovetocall.com/downloads/. It is easily installable on all Windows PCs. It has a menu option to enter the account userid and PIN. Then simply enter your phone number and make a call or by using the touch pad.

Web Dialer

Web Dialer software works like webmail. Visit our site www.lovetocall.com and click on "Make a Call" button. Enter the user account id and PIN. On the first time login, it will take a few seconds to connect to the GateKeeper. After that you can make a call instantly. This option is web browser based and gives the user the ability to call from any PC and from anywhere in the world.
